perma Lubrication Systems for Quarrying Industry

The quarrying industry puts men and machines under enormous strain. Spread out equipment, insufficient staff, rough operating conditions and cost pressure continuously challenge quarrying operators and employees. Automatic lubrication with perma lubrication systems can tremendously increase equipment availability and safety.

Lubrication points

❶ Roller bearings

❷ Sliding bearings / Sliding guides

Raw material processing

→ **Crushing**

Jaw-, cone-, roll crushers

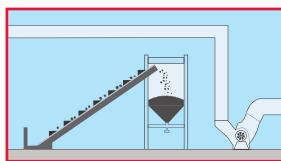

✓

✓

→ **Transport**

Conveyor systems

✓

Endproduct processing

→ **Screening**

Grit and sand screens

✓

→ **Sorting and cleaning**

Conveyor systems

✓

→ **Dust removal**

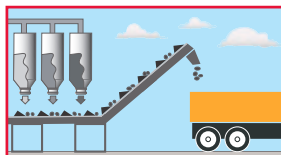

Dedusting equipment, fans

✓

→ **Transport**

Conveyor systems

✓

Storage and packing

→ **Packing**

Conveyor systems

✓

→ **Filling**

Silo discharge

✓

Challenges

→ Hard-to-reach and dangerous lubrication points

→ Extreme operating conditions (sludge, dust, dirt, temperature changes and vibrations)

→ High personnel costs from spread out and complex equipment

Advantages of automatic lubrication

- ✓ Remote installations of lubrication systems **reduce the time that workers have to spend in dangerous areas.**
- ✓ Continuous relubrication at short intervals **reduces wear** and **seals** lubrication points **against contamination.**
- ✓ **Scheduled exchanges** on running equipment **reduce personnel- and material costs** and increase economic efficiency.

Reference

Solutions

Direct mounting on lubrication point: e.g. perma FLEX

- Easy, quick mounting
- For lube-points with little vibration / shocks
- For easy-to-access and safe lubrication points

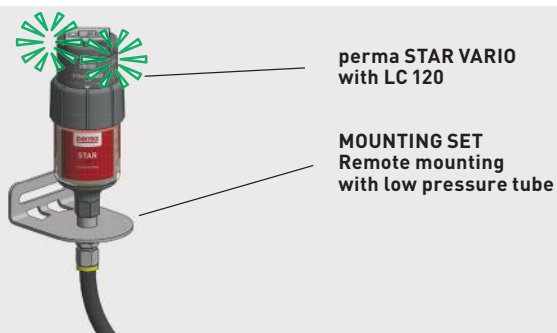

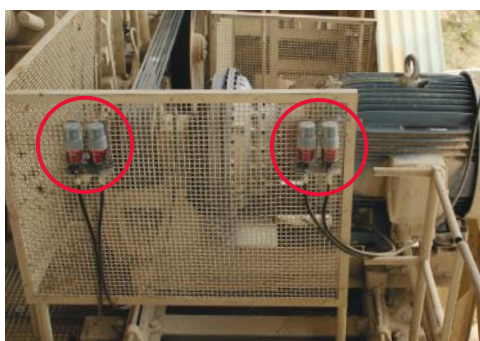

Art. No. 101476

Remote mounting to lubrication point: e.g. perma STAR VARIO

- For lube-points with strong vibration / shocks (isolation of lubrication system)
- When workers' safety is at risk: Mounting in safe areas
- For hard-to-access lubrication points

Art. No. 101482

Applications

Lubrication of pillow block on a pressure pulley

Lubrication of pillow block on a drive pulley

Lubrication of pillow block on a tail pulley

Lubrication of pillow block on a conveyor

Lubrication of pillow block on a belt weigher

Lubrication of pillow block on a conveyor

Remote lubrication of an electric motor

Lubrication of pillow block on a conveyor

Lubrication of pillow block on a tail pulley

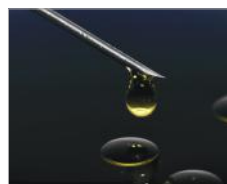

Individual solutions

perma Product portfolio

Solutions for all types of applications

perma Lubricants

Large selection of high quality lubricants to meet the requirements of your equipment

perma Accessories

Extensive range of accessories and connecting parts for your equipment

perma SERVICE

Project planning, installation and maintenance

perma SOFTWARE

Calculation of lubricant amount: • **perma SELECT**
Maintenance Lubrication Program: • **perma MLP**
